PROFILE

I'm a full-stack web developer passionate about building scalable, user-focused web applications from front end to back end. I enjoy solving real-world problems with clean, efficient code and have hands-on experience developing full-stack projects using MERN stack and modern **AI technologies**. I'm a fast learner who adapts quickly to new technologies and am eager to contribute to a collaborative team while continuously growing as a software developer.

EDUCATION

SHIVALIK COLLEGE OF ENGINEERING

Bachelor of Technology (Hons)
Cumulative GPA: 8.1/10.0

Dehradun, India
October 2021 – June 2025

ST. MARY'S CONVENT SCHOOL (CBSE BOARD)

Class X : 94.2%
Class XII : 92.4%

Dehradun, India
2018 – 2019
2020 – 2021

PROJECTS

AI Enabled ATS: TalentGPT | [Live Demo](#) | [GitHub](#)

- Developed an AI-powered Applicant Tracking System using React.js, Node.js, Express.js, MongoDB (MERN) with a modern, responsive UI.
- Integrated **Azure AI Document Intelligence** for intelligent resume parsing and structured data extraction, deployed on **Render**.
- Leveraged the **Google Gemini API** for context-aware candidate screening, skill matching, and AI-generated hiring insights.
- Implemented automated **anonymization** before AI evaluation to reduce bias during the initial screening process.

Multimodal AI Summarizer: NeuroDigest | [Live Demo](#) | [GitHub](#)

- Built a multimodal AI application using React.js, Node.js, Express.js, and Azure AI Services.
- Integrated **Azure AI Vision**, **Azure AI Document Intelligence**, **Azure Language** and **Azure AI Speech-to-Text** to extract text from images/documents, transcribe audio, and generate AI-powered summaries.
- Implemented secure file uploads using **Multer** for handling images, PDFs, and audio files.
- Enhanced backend security with **Helmet**, **Express Rate Limiter**, and RESTful API best practices.

Full-Stack Blogging Platform: sMv|Blog | [Live Demo](#) | [GitHub](#)

- Programmed complete **CRUD** functionality, enabling authenticated users to register accounts, set up profiles, and share their social links along with rate limiting to prevent abuse.
- Implemented a secure user authentication system, integrating a serverless **Google Apps Script** microservice to handle multi-factor email OTP generation and verification alongside standard credentials.
- Implemented post-management logic allowing users to write rich content using the **TinyMCE** Rich Text Editor and toggle posts between active and inactive public states.
- Connected the Node.js backend to **Azure Blob Storage** for managing blog image uploads

Skills & Certifications

Languages: JAVASCRIPT, C/C++, HTML, CSS

Frameworks & Libraries: MERN, EJS

Tools: Mongo DB Server, Azure, Vercel, Render

Certifications & Training: Azure AI Fundamentals
